

## Money

When it comes to addition, using money is another great way to apply what is being learned to every day life. The lesson below had the students acting as if they were going to a store with only a certain amount of money. They then had to figure out if they had enough money to buy different combinations of items by using addition.

go about solving problems. Here are some sample problems:

- *You have 10¢. Can you buy a pencil and an eraser? How much money will you have left over?*
- *You bought two things and spent 7¢. What did you buy? See if you can find more than one answer.*
- *You have 9¢. How many crayons can you buy? How many erasers? pencils? stickers?*
- *You have 10¢. If you buy two crayons and one eraser, how much money will you have left over?*
- *You have 9¢. You want to buy a pencil and a sticker. Can you buy anything else?*
